Anonymous Grading

On the Create Assignment page, you can choose to hide student names when viewing and grading submissions. Students are alerted to the anonymous grading setting on the Upload Assignment page. However, in your assignment instructions, you can additionally ask students not to include any information that identifies them, such as adding their names to files they attach to assignments. In the Grading Options section, select the Enable Anonymous Grading check box and choose when you want to automatically remove students' anonymity:

3. Grading

Grading Options

You can choose to hide student names from submission attempts during grading, making them anonymous. Separate grades, feedback and notes to students. Users with the ability to reconcile grades may review all the instructors have reconciling abilities.

- Enable Anonymous Grading
  Student names are hidden during the grading process.

- Enable Delegated Grading
  Delegate grading responsibilities to one or more additional grader.
Calculated Formula questions present students with a question that requires them to make a calculation and respond with a numeric answer. The numbers in the question change with each user and are pulled from a range that you set. The correct answer is a specific value or a range of values. You may grant partial credit for answers falling within a range. Calculated Formula questions are graded automatically.

Question 11

If a small glass can hold 6 ounces of water, and a large glass can hold 9 ounces of water, what is the total number of ounces in 4 large and 3 small glasses of water?

An instructor created this question by typing the following question text:

If a small glass can hold [x] ounces of water, and a large glass can hold [y] ounces of water, what is the total number of ounces in 4 large and 3 small glasses of water?

When a student views the question, the variables [x] and [y] are replaced with values that are generated randomly from number ranges that an instructor specifies.
The look and feel of My Grades has been updated. Students now view feedback by clicking the blue icon for View Feedback:

Student Preview

As an instructor, you want to be confident that your course is well designed and functions as intended—before your students see it. Use student preview to review the course content and validate the course behaviors, such as those that control the availability of course content or require a particular interaction from the student to be triggered.

- Submit assessments
- Take tests
- Create blog and discussion posts
- Create journal and wiki entries
- View student tools, such as My Grades
