With the *Mediasite* Building Block for Blackboard, your Mediasite-recorded lectures and presentations can be easily published to Blackboard. Students then have convenient anytime access to your rich media presentations directly within your Blackboard course, including fully-synchronized audio, video, and presentation materials from PowerPoint and electronic whiteboards to document cameras or other presentation devices. Viewing *Mediasite* lectures within Blackboard requires nothing more than the student's web browser.
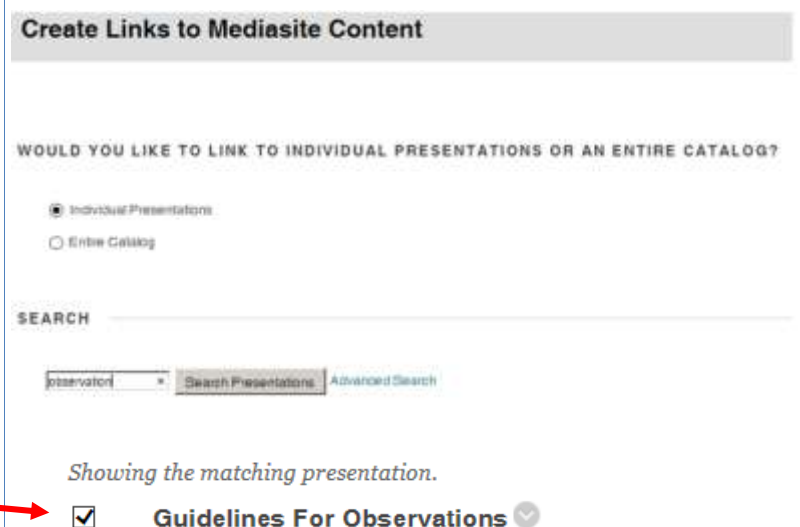

1. Go to the content area of your course where you want to create a link to your *Mediasite* presentation.

   Under *Tools*, choose **Link to Mediasite Content**:

2. In the **Create Links to Mediasite Content** window:

   a) Select *Individual Presentations*
   b) In the **Search** box, type a keyword contained in the title of your *Mediasite* presentation
   c) Click on the button *Search Presentations*
   d) Any of your *Mediasite* presentations with the keyword in the title will then be displayed. Check the box to select the desired presentation.

3. After you click on **Submit**, a confirmation will appear. Then click on **OK**.	**Mediasite Content Added** You (mmcdonough) have created the Mediasite link successfully. Wednesday, March 25, 2015 3:31:35 PM PDT
4. The link to your Mediasite presentation will then appear:	**Guidelines For Observations** GUIDELINES FOR OBSERVATIONS
